

Michele Liparesi

Michele Liparesi (Bologna, 1986) lives and works in Bologna, Italy.

His interest in sculpture started while studying at the art college and has later led him to graduate from the Academy of Fine Arts in Bologna and in Florence.

Liparesi's artistic approach is based on the emotional necessity to explore space. His work, often made of recycled and reused materials, invites us to reflect on the relationship between the environment and time and on the fragility of our perception of both.
